

With the **ANTlabs InnGate** (<http://www.antlabs.com/products/inngate/>), a **Service Management Platform** for the hospitality industry, you can:

Monetize existing complimentary Internet services.

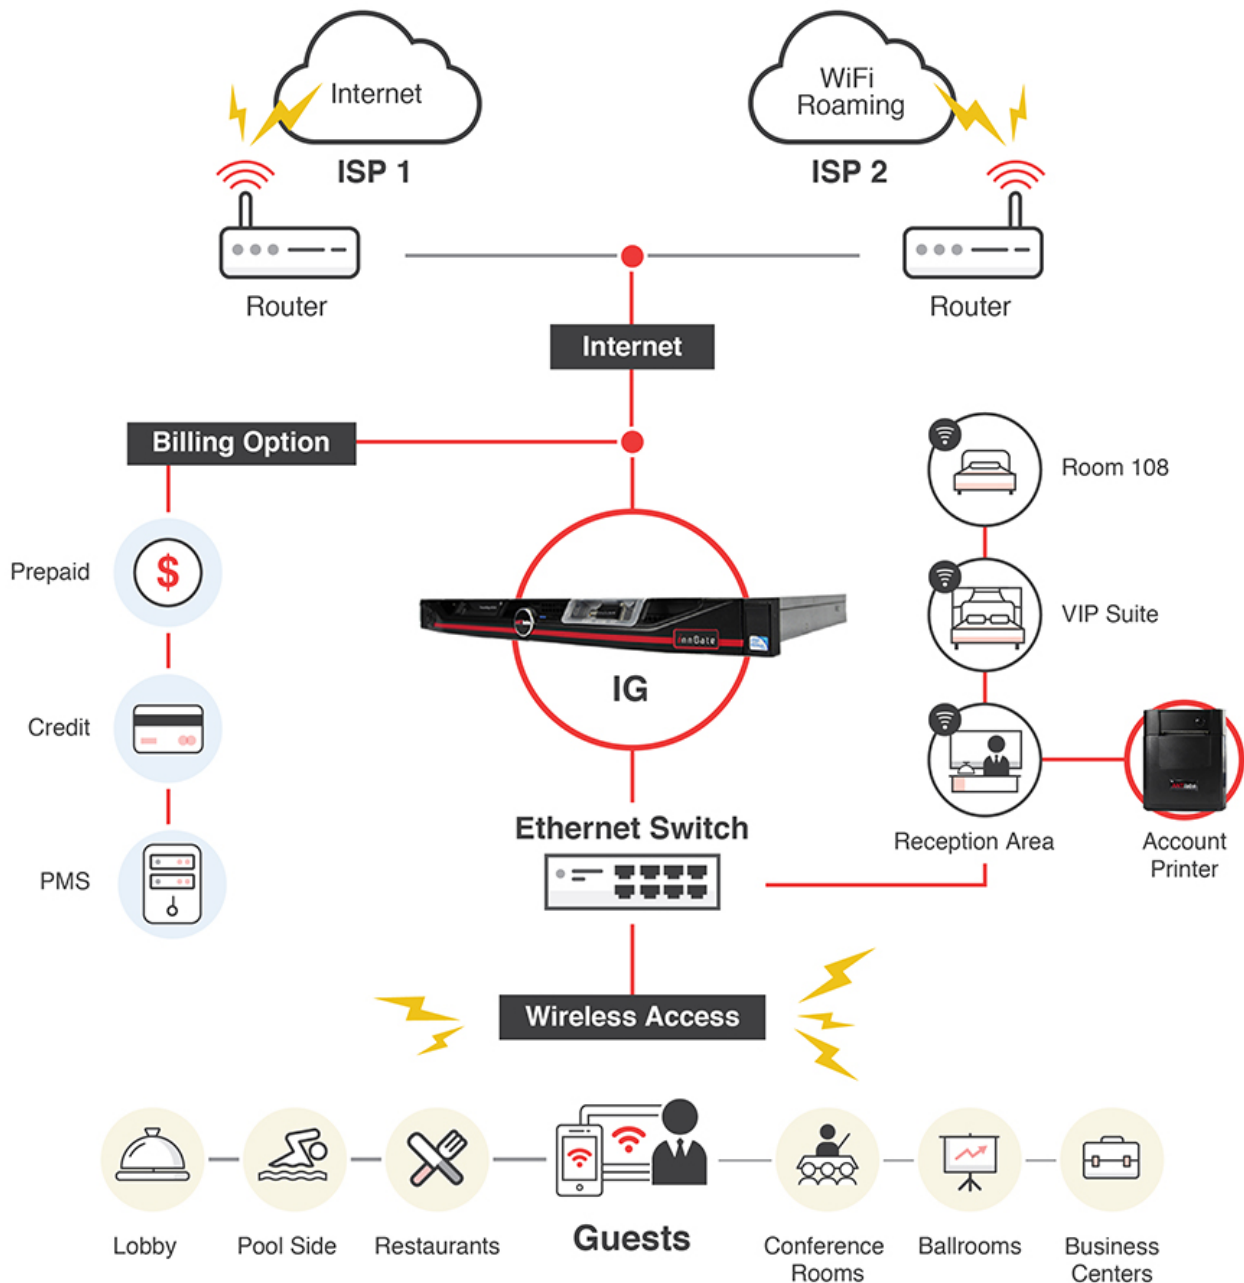

Maximize limited bandwidth, improving the Internet experience.

Create your own free and paid tiers from the InnGate's **built-in Internet service plans**, and integrate your own **custom systems** through its API if needed.

Then offer guests immediate connectivity using a one-touch **account slip printer** that interfaces with common Property Management Systems for billing.

Control network usage through the InnGate's **bandwidth management features**: volume prepaid, session rate limits, and more. Ensure business traffic is prioritized while P2P and streaming is throttled.

The **ANTlabs InnGate** (<http://www.antlabs.com/products/inngate/>) enables you to **give guests high-speed WiFi that they will pay for**.
